

Technology risk and resilience services

Business continuity and resilience

protiviti®
Global Business Consulting

Businesses are increasingly impacted by the rapid pace of technological innovation and a volatile global risk environment, which disrupts operations, supply chains and market stability. Business continuity and resilience programs enable swift response and recovery, safeguard assets, help maintain customer trust and secure long-term success amid the uncertainties of the digital age.

Is your business prepared for a crisis?

No one can predict when the next disaster or business disruption will strike. The only certainty is that something unplanned and disruptive will happen.

As technology evolves and the digital landscape grows, a comprehensive business continuity and resilience program provides strategic advantages to address many challenges:

- Vulnerability to threats such as cyberattacks, natural disasters or other crises can lead to significant financial loss, unplanned downtime and reputational damage.
- Many industries are regulated by laws that require some form of business continuity planning. Non-compliance could result in legal penalties, fines or sanctions.
- Rapid technological advancements require companies to continually adapt their operations. Without a resilience plan in place, they may struggle with system compatibility issues and employee training needs, which could hinder operational efficiency and growth.

Business outcomes of our solutions

A crisis management plan that facilitates decision making, implements brand monitoring and protects your digital footprint.

Resilient architecture designed with redundancy, replication, backup, failover, recovery and functionality.

An IT disaster recovery plan that minimizes downtime, secures data integrity and maintains customer trust.

A business resumption plan that organizes, assesses and mitigates the risks associated with business disruptions.

Protiviti sets the standard in business continuity management (BCM) with our unique strategy and seasoned experts across finance, operations, data analytics, digital innovation, compliance and cybersecurity. Our team offers unparalleled, tailored solutions that protect and elevate your business.

Case study:

Fortune 500 manufacturing organization deploys a BCM program

NEED

This client sought assistance with a global business continuity program for corporate functions, manufacturing sites and distribution centers. A prior audit revealed poor management visibility, inconsistent planning and unclear BCM roles.

SOLUTION

We worked with the client to develop an enterprise-wide program fit for purpose for the business. Key elements included a governance function, steering committee, continuity risk assessment and business impact analysis.

BUSINESS OUTCOME

The comprehensive BCM plan allowed the client to benefit from real incident-tested recovery strategies, aligned regional team plans to ensure future effective response and recovery and reduced downtime and response time.

How Protiviti can help:

We perform business continuity assessments, develop plans and provide implementation services across the BCM lifecycle.

- Assess current BCM program maturity and capabilities.
- Gain an understanding of priorities, create a plan for disruptions, employ best practices and increase organizational ability to course-correct quickly.
- Prepare and build resilience to the unknown and manage technology risk, rising from rapid digital change and growing cyber concerns.

Our approach

Using Protiviti's proven holistic methodology across the BCM lifecycle, we integrate leading practices into operations and resilience strategies:

Business continuity program assessment

Continuity risk assessment

Business impact analysis

Business continuity managed services

Business continuity testing and training

Strategy development and implementation

Continuity program management

Ready to transform your business?

Let's create a tailored strategy for your success.
