[Why Everyone Should Be Preparing for an SAP Datasphere Migration](#)

Preparing for an SAP Datasphere migration is crucial as organizations increasingly rely on data-driven insights. This transition offers significant benefits, including enhanced data integration, real-time analytics, and streamlined workflows.

Proactive planning is essential to ensure a smooth migration process, enabling businesses

to fully leverage the capabilities of SAP Datasphere for improved data management and decision-making. Embracing this change now can position organizations for success in a rapidly evolving data landscape.

[The Hidden Costs of an ERP Transformation](#)

As a leader about to undertake an ERP transformation, it is important to remember that these projects rarely go as planned. Like a house remodel, there will be hidden costs to be addressed throughout the implementation. Whether it be that design tastes (requirements) change, the costs unexpectedly increase or an unexpected labor shortage that increases the timeline, it is important to learn from the construction industry and incorporate contingency into program budgets.

[Read More](#)

Read on to learn a few of the common hidden costs of any ERP implementation and how to use contingency to avoid being caught unaware.

[Hands-On Workshop — Hosted by Protiviti](#)

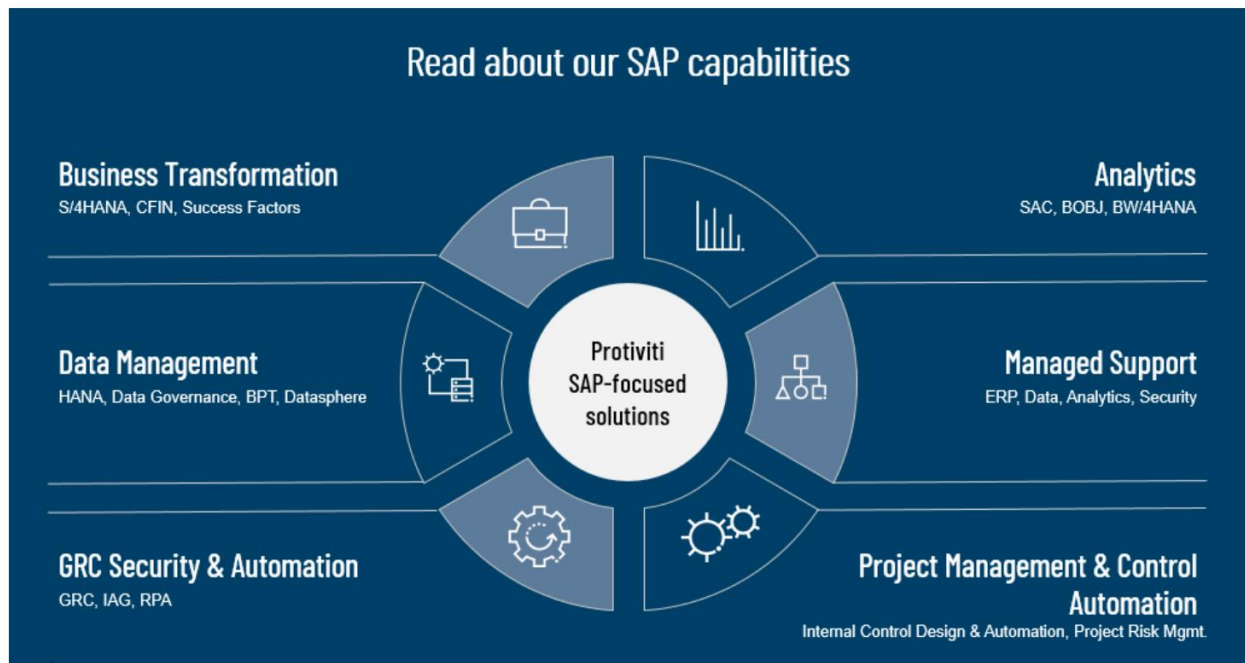

Wednesday, October 16 | 11:00 a.m, EST

Protiviti, together with SAP, invite you to join this two-hour virtual hands-on workshop.

In this session, you will learn how to:

- Apply best practices to load enterprise master and transactional data from Datasphere to SAC Planning models to streamline financial reporting
- Use SAC Web and Excel interfaces to create standard enterprise financial reporting packages and content from Datasphere-sourced data (GAAP and non-GAAP P&L, balance sheet, cash Flow, currency conversion and impact, variance bridge, ROIC, EPS, etc.)
- Apply best practices for building and using custom-calculated measures and account dimension to streamline standard SAC financial reporting.
